I have a box full of cables. I have a really big box full of cables.

And some day I decided that it would be nice to get a cable out of that box without fighting knots for the next twenty minutes.

And so I printed this small clip. :D

It works best for USB cables, but headphone cables will work as well. Length can be from 20cm to 1m (that is... maybe 1-3 feet. Maybe not) with the model provided but feel free to scale it up or make a bigger loop.

Use different colors for different cable types. Yellow is MicroUSB, red is Lightning etc.

## Print instructions

This prints without infill. I use PETG at 0.3mm.
